

Pensioners who are members of the Public Service Health Care Plan (PSHCP) will have to pay more for their coverage as of April 1, 2011, if they reside in Canada. Information related to this increase is posted in the news section of our Web site: <http://www.fsna.com/blog/>

The PSHCP Bulletin No. 25 that was to have been issued in February has been delayed at least until mid-March to allow for this contribution increase to be included in its content.

The following tables show rates to be applied as of April 1 and the current ones, which have been applied since April 2006.
